Professional Summary

Artificial Intelligence undergraduate at Pak-Austria Fachhochschule: Institute of Applied Sciences and Technology (PAF-IAST) with practical experience through internships in Cyber Security, Web Development, and Artificial Intelligence/Machine Learning. Passionate about building AI solutions that solve real-world problems. Skilled in Python, C++, HTML, CSS, JavaScript, and Machine Learning fundamentals. Currently participating in the AuratTech AI Engineering for Developers Fellowship, where I am developing an AI Career Copilot as a capstone project. Eager to contribute, learn, and grow as an AI Engineer.

Education

Bachelor of Science in Artificial Intelligence (BS AI)
Pak-Austria Fachhochschule: Institute of Applied Sciences and Technology (PAF-IAST)
Haripur, Pakistan

Expected Graduation: 2028

Internships

AI Engineering Fellow

AuratTech – AI Engineering for Developers Fellowship *(Current)*

- Participating in hands-on AI engineering training.
- Developing an **AI Career Copilot** as a capstone project.
- Working with teammates using collaborative development practices.
- Learning AI application development and modern AI engineering workflows.

AI/ML Intern

Prosensia

- Learned Machine Learning concepts and AI development workflows.
- Built and trained an AI microservice for **Heart Disease Prediction**.
- Worked with Python and machine learning tools for model development.
- Improved understanding of AI model development and deployment.

Web Development Intern

Youth Tech Link

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Designed user-friendly web interfaces following responsive design principles.
- Improved front-end development skills through practical assignments.
- Collaborated on web development activities and project tasks.

Cyber Security Intern

Technik Nest

- Learned the fundamentals of Cyber Security.
- Gained practical experience using Linux and command-line tools.
- Studied basic system security concepts and cybersecurity practices.
- Performed practical lab exercises to strengthen technical knowledge.

Academic Projects

AI Career Copilot *(Capstone Project)*

Technologies: Python, AI, Machine Learning

- Developing an AI-powered career guidance system that helps users explore career paths and receive personalized career recommendations.

Heart Disease Prediction AI Microservice

Technologies: Python, Machine Learning

- Built and trained a machine learning model to predict heart disease risk.
- Integrated the trained model into a simple AI microservice.

Responsive Website

Technologies: HTML, CSS, JavaScript, AI

- Developed a **Study Time Companion AI** to help students manage and organize their study routines more effectively.
- Designed features for study scheduling, reminders, and productivity support to improve learning consistency.
- Focused on creating a simple and user-friendly interface for better student experience.

Student Search System

Technologies: C++, Data Structures

- Developed a student management and search system using searching algorithms.
- Applied object-oriented programming concepts to organize student records.

Flight Management System

Technologies: C++, Object-Oriented Programming

- Developed a console-based flight management application.
- Implemented OOP concepts for managing flight and passenger information.

Technical Skills

Programming Languages

- Python
- C++
- JavaScript

- HTML
- CSS

AI & Machine Learning

- Machine Learning Fundamentals
- Data Preprocessing
- Model Training
- AI Microservices

Web Development

- HTML5
- CSS3
- JavaScript
- Responsive Web Design

Databases

- SQL *(intermediate level)*

Tools & Technologies

- Git
- GitHub
- Linux
- Docker
- VS Code

Certifications & Training

- Cyber Security Internship | **Technik Nest** | August 2025
- Web Development Internship | **Youth Tech Link** | July 2025
- AI/ML Internship | **Prosensia** |July 2026
- AI Engineering for Developers Fellowship | **AuratTech** | July 2026 *(In Progress)*
